

ENVIRONMENTAL POLICY STATEMENT

Everyone (staff and contractors) employed by Rugeley Power Limited (RPL) will carry out the business of generating electricity from fossil fuels and biomass, and the management of the associated ash disposal, with a commitment to continual environmental improvement and prevention of pollution.

RPL is committed to achieving the best possible environmental performance. The policy principles which guide this are:

- Review and minimise environmental impact and use energy and natural resources in a more sustainable way, by integrating environmental, social and economic factors into business decisions, goals and objectives wherever practical.
- Comply with all applicable environmental regulations and seek effective working relationships with appropriate agencies.
- Implement and maintain effective environmental management systems and seek external accreditation to demonstrate compliance.
- Seek to constantly improve environmental performance, including setting appropriate objectives, targets and incentives wherever practical.
- Ensure staff and contractors employed by RPL are properly trained and motivated to conduct their activities in an environmentally responsible manner.
- Work with our customers, partners and suppliers to use natural resources efficiently and in a more sustainable way.
- Review and report on our environmental performance honestly and openly.
